# MINING, BUSINESS AND STOCKS

# CONDITIONS AT THE UNCLE SAM.

Superintendent Griggs Has Informed President Dern of a New Strike on Intermediate Level.

# BELIEVED TO BE A GOOD ONE.

Twenty Mine Cars of the Ore Being Sent to Mill Daily-Leasers are Making Money.

The stockholders in the Uncle Sam Consolidated mine of Tintic have nothing to get discouraged about. The management of the company is making money for them right along, and while dividends are being paid at the rate of \$3,000 per month, the surplus in the treasury is growing.

Superintendent Origgs reports encouraging conditions everywhere and in a communication to President Dern has reported the strike, which is likely to prove to be important, on the intermediate level where the crossthe intermediate level where the cross-cut has opened into a body of Carbon-ate ores. He is deriving from this place about 20 mine cars of ore daily, which is being sent to the mill. Supt. Griggs exfresses the opinion that he will not have to proceed with the cross-cut much further to get under the spot where a gold strike was made on an upper level some time ago. The superintendent says the leasers

working in the mine are meeting with success, and three car loads of high grade stuff is now ready for shipment. Three car loads of concentrates landed at the smelter today.

#### ON MINING EXCHANGE. Business Fairly Brisk During the Early call- Quotations and Sales.

The trading on the Mining Exchange was more animated today than usual. A number of stocks were in better ione and commanded a higher price. Al-though Daly-West was not wanted in great quantities a small lot sold at \$14.10. Grand Central offered at \$3.85 was taken, while May Day advanced from 5 to 5½ cents in the sales, closing 5 cents bid. Silver Shield started off at 4 and advanced to 4½ cents. Sacramento came out on the open board at 13% cents.

The closing quotations and sales were

## MONTANA'S NEW STRIKE.

Important Find Sald to Have Been Made On 500-Foot Level.

It is reported from a reliable source that a great strike has just been made on the 500-foot level of the Montana-Tonopah, at a point about 500 feet west of the crosscut, says the Tonopah Miner. According to the report a rich shoot has been opened up in the Mac-donald ledge which shows between 4 and 5 feet of ore that assays higher than any ore-shoot of this magnitude heretofore found in the mine. While the information lacks official confirmation, it is believed by well-informed observers that it is trustworthy.

Schilling's Best.

# ACTIVITY NEAR MOAPA.

A Number of Prospectors Have Made Gaod Strikes Near There. Special Correspondence.

Callente, Nev., Sept. 18.—John Hussey and Miles Brown, owners of the Little Jim group, southeast of Mospa, have just cross-cut a 7-foot vein of free gold ore going \$23.70 per ton, in a 69-foot tunnel run, to pressent the 0-foot tunnel run to cross-cut

60-foot tunnel run to cross-cut the ledge at a depth of 70 feet.

John Finley, owner of the Black Diamond Copper mine, north of Good Springs, has received assays of 48 and 32 per cent copper per ton from ore taken from a 12 foot ledge.

J. T. Miles of Colorado came through camp today enroute to Los Vegas, where he will prospect southerly to the Colorado river.

Mike Dolan and H. Finks have cross-

cut a 6-foot ledge of gold-silver ore going \$8 gold and 210 ounces silver or their Mizpah claim at a depth of 119 feet, 24 miles north of Los Vegas. J. M. Dicker and Ralph Wells have struck a 14-inch vein of \$182 free gold ore on their Virgin River claims. They are running a 300-foot tunnel to oper a 12-foot ledge of \$42 ore, and struck

the big values at 147 feet from begin-Joe Bullard brought in two sacks of rich copper (black oxide) ore from their Good Spings claim.

#### AMARGOSA VALLEY STRIKE. Property in Builfrog, Nevada, District Under Option to Salt Lakeite.

The general opinion of those compe eut to judge is that the latest strike ir the Amargosa valley is likely to make a big mine, although at present practically no work has been done, says the Fonopah Bonanza. The original locations having the finest showing have been optioned to T. F. Clark of Sak Lake, for \$100,000, of which \$10,000 is to be paid down. Clark only had a 10-days option and to save time traveled to Salt Lake across the desert to the Clark road. His time had expired on Thursday, but he wired that he was on his way back with his buyer, so the owners extended the option until his ar-

#### NEARING COMPLETION. Bingham Con. Furnace Buildings Will be Finished This Month.

Constructing Engineer James Burke is putting on the finishing touch es to the new smelter buildings now in the course of erection at the plant of the Bingham Consolidated. Mr. Burke says all the material is on the ground and that he expects to have his contract fulfilled by the end of the

#### CONCENTRATES.

Two car loads of Tonopah ores are at the sampler today. Willard F. Snyder is at the Honerine mine at Stockton today.

The Mammoth of Tintic has some ore at the samplers today. Engineer D. P. Rohlfing departed to-

day on a business trip to Chicago. Treasurer A. 'A. Ball of the Annie Laurie bine at Kimberly is in the city

again. A. D. Moffat, foreman of the Ontarlo properties in Park City was in the city

E. A. Vall departed for Austin, Nevada, today to survey a group of mining claims.

Constructing Engineer J. M. Callow expects to depart for Butte the latter part of the week,

Some lease ore coming from the Un-cle Sam Con., of Tintic, will average \$30 a ton in value.

Duncan McVichie, general manager of the Bingham Con., has returned home after an absence of 10 days.

Ben T. Lloyd has returned from a

trip to Beaver county where he went to look after mining interests. Thomas J. Lynch, the Tonopah min-

ing man, is spending several weeks on the coast, accompanied by his wife.

The September dividend of the Un-cle Sam Consolidated was checked out today by Secretary Thompson. Amount, \$3,000. Supt. F. W. Sherman of the Daly

West mill was in the city over night and took the early train for Bingham

The Mountainview property in the Pine Grove district, Idaho, has been purchased by Irvin and Lebar, of Doug-

The ore and bullion settlements reported late yesterday were as follows Crude ore and concentrates, \$49,700; base bullion, \$36,100.

President S. L. Butler of the Summit Placer company has decided to estab-lish his permanent headquarters in this rity and has leased a suite of rooms in the McCornick block,

The Kansas City syndicate, operating in the oil field at the north end of the Great Salt Lake, and known as the Royal Oil company, has a well down to the depth of 900 feet,

Manager G. D. B. Turner of the South Quincy Mining company, who has been abroad for several months in the interest of his company, has returned home and left this morning for Park City, to size up conditions at the mine.

Supt. Rives of the Pioche-Nevada Con, company paid all bills against the company on Monday. The mine at the

Point continues holding its own, exhibiting ore wherever work is being done. Joe Enzeusperger, who has been mak-

ing a thorough inspection of the mines, as well as business conditions at Tonopah and Goldfield, has returned so enthusiastic over those camps that he has decided to engage in the restaurant business in Goldfield. He will seturn to that camp within the next few days.

Mr. J. Montgomery of Colorado Springs and Cripple Creek has been in this vicinity for near a week examining different mining properties. He has secured a bond on several claims, and on leaving Wednesday he stated that he would return in thirty days and place men to work on these claims .- Pioche

E. L. Godbe arrived in Pioche on Thursday. He states one-half interest in the plant and tailings at Bullionville has been sold for \$25,000, some of the debts hanging over the old company paid and tests being made as to the best process for working the tailings. As soon as this has been demonstrated work will start at Bullionville,-Pioche

The Record learns much placer mining is going on in the territory that lies between the Muddy and Virgin rivers, and thousands of dollars in gold dust is being washed out weekly by the prospectors. That section of country, with the exception of a few water holes, is devoid of water, but the ingenuity of the prospectors has overcome this difficulty. During the summer there is nearly always a strong wind blowing between the rivers and the prospector sits on a boulder, gets his eyes filled with dust, washes the dirt out with tears of joy, pulis the lower eyelid down and secretary the gold dust. and scrapes out the gold dust,-Pioche

# COPPER EXPORTS CONTINUE HEAVY.

The Depletion of Stocks in Foreign Lands Creates an Increased Demand for Metal.

## **CERMANY A COOD MARKET NOW**

The War in Manchuria Has Had Its Effect Too -- Future Looks Bright To Copper Producers.

Copper is enthroned by unprecedented foreign demand and men who deal n the metal are correspondingly elated for they have confidence that the future s radiant. The high record for exportation is still maintained and renders the acceptance of domestic orders for immediate delivery practically beyond consideration at the present stage of the trade, says a writer in the New York Commercial.

There have been much interest as to where the great tonnage sent abroad has been and is still going, what use is being made of it and wny there has been such a steady and inspiring de-Upon information and assurances from very high authority it can be said that no speculative purpose i involved. It is due to depleted stocks and a renewal of activity in electrical enterprises in Germany. During 1901, 1902 and 1903, a financial depression compelled the abandonment of many important projects until such time as improved conditions made it possible to go on with them. During this year there has been sufficient recovery from stagnation to create an awakening and in the last six months important under-takings have been resumed that in a arge measure led to orders for cop-

Selling agencies agree that while the war between Russia and Japan was at one time almost a lone influenceing factor in the situation, it is no longer so as Japan is not now placing any orders, its home production and supply on hand seemingly meeting present needs, With prolongation of the conflict however, exportation to that country may be renewed, if ammunition is expended at the rate that it has been London, Rotterdam, Holland, and

other countries are buying, and in every instance investigation has shown is for consumption and not speculation.

Domestic consumers have been com-

ing forward, and this has been practi-cally in evidence during the present month, with indications that their or-ders will multiply from now on and to such an extent that increased difficulties will be experienced in filing them. The improvements of the Pennsylvania and the New York Central are to exert a strong influence on the market, to say nothing of other operations in the electrical field, including new lines of street and interurban railways.

If exportations for September fall if in comparison with August, it will not be due to fewer orders, but rather to the fact that the supply is not equal to the demand. While there is no disposition to encourage the idea that a copper famine prevails or is pending, it is admitted by those in close touch with the situation that the present scarcity is more likely to become great-er than to diminish. They are inclined to the opinion that a copper era is in sight and so close at hand that the market is to receive still further and

Taking all these matters into consideration the impresion recently manifested that 13-cent copper is not alto-gether insprobable, is strengthened. With so much certainty of greater con-sumption at home and the likelihood of uninterupted heavy exportations, present prices are sure to be upheld and

may advance. Exports so far this month are 6,825 tons, the total this year being 163,854

# NOTED SMELTERMAN HERE.

Dr. Peters, an Authority on Smelting. Visiting the Valley Plants.

Dr. Peters, the author of a well known work on the subject of smelting, has arrived here for the purpose of making a thorough inspection of the valley plants. The doctor is making a general tour of the country during hich he is studying pew methods and

While here it is his intention to investigate that vast area of territory in the vicinity of Murray and Bingham Junction, where the fundes coming from the high stacks has devasted the farms of their vegetation.

While in Montana Dr. Peters noted the vast changes that had been made Anaconda, where the management of the Amalgamated smelters had apparently solved the smoke problem ef fectively. On fertile ground, where, a few years ago, had been made a barren waste because of the smelter fumes, gardens are growing and other forms of vegetation are in evidence.

Dr. Peters is of the opinion that ome method can be devised, and undoubtedly will be, whereby the farms now affected will be productive again.

# CHECKMATE MINE CLOSED.

Friction Between Owners of Mine Said To be the Cause.

The Checkmate mine at Pearl, Idaho, has been ordered closed down by Manager E. H. Dewey. The order was effective on last Friday night when the pumps were pulled and the employes paid off. From an authentic source it has been learned that the cause of the shut-down was due to friction arising between Manager. arising between Manager Dewey and some of his co-owners. It is feared in camp that one of the results of the shut-down will be the closing of the Lincoln mill for a time, as the latter received its water supply from the Checkmate.

# After Utah Zinc Ores,

The Los Angeles Zinc Reduction works has a representative, a Mr. Deo-little, looking over the local field with a view of entering it for the purpose of working up business. It is believed that after the completion of the Salt Lake Route the zinc ores of this state can be profitably shipped to the coast city for reduction

The Los Angeles concern is the owner of a process which has proved a success wherever tried in California, After the ore is crushed, it is then roasted in a muffled furnace. Following roasting, the zinc contents are saved by leaching, while the residue comes out in the shape of a concentrate containing all of the precious metals which happen to be in the ore.

# U.S. STEEL STOCKS OFFERED FREELY

Effect Was to Cause the Entire List to Yield Considerable Fractions.

#### SELLING ORDERS CENERAL

Liquidation of Stocks Ceased Quite Generally During Midday Period.

New York, Sept. 20 .- Prices in the stock market today soon yielded under free offerings which were notably heavy in the S. Steel stocks, Pennsylvania and Southern Pacific, The Pennsylvania group and the U. S. Steel stocks were most affeeted, U. S. Steel preferred declining to 56%, and the common and St. Paul lost a point. Lead rose %.

Selling orders appeared throughout the general list and caused losses of a point or more in the principal trunk lines, Pacifics, grangers, cotton carriers, southwesterns and coalers, industrials and local tractions, besides a large number of specialties. Declines were quite uniform but Lackawanna fell 5% and Colorado Fuel 2. The low temperatures in the northwest and the strength of the grain market influenced stocks. Prices were reaching new low levels at noon.

Bonds were irregular at noon. Liquidation of stocks ceased pretty generally during the tald-day period, although there were favorites that soid a fraction lower. Business became dull when prices began to rally Union Pawhen prices began to raily 1 mon Pacific advanced to a shade above yesterday's closing, but the rally was slight.

Although Union Pacific extended its rally to 25%, other stocks were rather unresponsive and a vigorous selling movement at 2 o'clock drove many of the leaders to a lower level than before. U.S. Steel preferred scored a loss of two points and the common sold at 16. New York Central and Louisville & Nashville fell 2, Northwestern 2%.

### A CLOCK FOR CALCULATORS.

Dr. W. S. Rainsford is a great sal-mon fisherman. Nearly every sum-ner he goes salmon fishing among the Canadian rivers, in a wild and remote ountry where the people are quaint. One day in Canada Dr. Rainsford lunched with an aged farmer. His watch had stopped, and he took it out to set by the tall hall clock that stood in a corner. But this clock proved, upon inspection, to be three or four hours

"Your clock is wrong, isn't it?" said

Dr. Rainsford, politely.

"Not a bit wrong," replied the farmer. "It's you that don't understand it. When the little hand's straight up and the big hand's straight down, it strikes ten, but the right time's 5 o'clock. Then," he added, "you've nothing to do but calculate."

#### SEVENTIETH DIVIDEND.
